
Wellbore Rubber

The Pro Tool Wellbore Rubber is a multi use tool that is used on companion style wellheads during BOPE installing or removal. The WBR is designed with a multi-step feature allowing the rubber to be used with a variety of wellhead sizes. This tool eliminates the well being "open" for a long period of time when installing or removing the up BOPE.

Features, Advantages and Benefits

- Rugged Construction
- Off-set grooved opening allows for better sealing when set in the wellhead.
- Long handles keep rig personnel out of crush points when installing and/or removing the WBR
- Multi-step design allows for wide variety of wellhead sizes (6"-14" opening)
- Available for 2 7/8 and 3 1/2 tubing.
- Wide top plate allows the tubing slips a solid surface to sit when placing the slips at the wellhead.
- Variety of elastomers available
